How to start Time Bank Application

Group 12: Feiyu Chang | Jiaqi Feng | Yufei Liu | Chuting Yang

Brief description:

Time Bank is an application where one would be able to trade time between each other just like you would trade money. User has two roles, requester and responder, requester could add new job request for others to view, and once someone accept the job, responder will be notified in their profile and approve, disapprove, or cancel the job according to their will. On the other hand, responder could browse through the existing job request and accept any job request as their will. Then the responder could check whether the they have been approved or disapproved by the requester. After they have finished, they could click finish button on the job detail page located in profile page.

Instruction on installing the application

1. To run, please download the newest version of XCODE (Version 10.2.1 (10E1001))

2. Then open TimeBankOffical.xcworkspace using XCODE

3. If a warning pops out regarding trust issues, select open to open the application

4. Click run button on the left top corner

5. The simulator will show once it finish compail
